

FULL NAME:

MARY NDUTA MWANGI

INSTITUTIONAL AFFILIATION:

KENYATTA UNIVERSITY/ ASSOCIATION OF AFRICAN WOMEN IN SCIENCE AND ENGINEERING (AWSE)

Mary Mwangi holds a Bed (science) Hons in Education, Botany and Zoology and an Msc (Genetics) both of Kenyatta University. She is currently a PhD Fellow, Lecturer and researcher, staff mentor and academic advisor in the Department of Biochemistry and Biotechnology at Kenyatta University. Her area of specialization is banana Biotechnology; specifically disease resistance breeding and the popularization of tissue culture banana seedlings among rural farmers in Kenya. Mary has won several training fellowships, research grants and travel grants which have enabled her to undertake research, make presentations in regional and international conferences and participate in leadership and biotechnology training programs. Mary is also a member of several professional bodies including INWES and AWSE. She is an executive member of the Association of African Women in Science and Engineering (AWSE), where she is currently serving as the secretary. Through this association Mary has gained experience in implementing regional programs and organizing international Conferences including 3 INWES/AWSE regional meetings in Africa (2004 and 2013 in Kenya and 2015 in Uganda).
