

## **RYM MOUSSAOUI**

I was born in a rural village in the north of Tunisia well-known for its wonderful landscapes and agricultural activities that's why I'm highly motivated by agronomic sciences, capacities building, training, cooperation and international exchange in agriculture, I achieved my studies as an agronomic engineer in the high school of horticulture in Tunisia specialized in landscaping architecture. I have excellent abilities of adaptation and communication, essential to work in different contexts and between the different actors of the rural development: farmers, researchers, politicians, associations... My integrative vision is an essential skill to consider the different scales and dimensions (environmental, economic social and innovation) of the agricultural and the economic development in general not only in my country but all over the world. Serious in my work, conscientious and well-organized, I always strive to achieve a very high standard in whatever I undertake.

### **My Objective**

To pursue a career in the agricultural development Consulting and cooperation. where I can bring skills acquired at university and through my work experience. To work for a sustainable and integrated agriculture, responsible and conscientious of its impacts.

### **Specializations:**

Landscaping architecture, Horticultural sciences Training, Consulting in sustainable development, Agronomy, Capacity building, Green Communication, Agricultural development and cooperation, Agro-ecology, Agro-environment, improving entrepreneurial skills in rural areas, training to Improve gender equality in the rural economic activities.
